

8x8 Jitsi as a Service

World's easiest way to add meetings to
your apps

8x8

One platform.
Every communications experience.

It is important to humanise your digital interactions

75%

of customers want more human interaction

89%

of businesses plan to use embedded video APIs
in the future

But there are challenges

41%

of users said that overly difficult downloads or joining processes discourage them from using a video meetings service

9-12 months

of R&D needs to be invested to build a video meeting solution from scratch

\$3000

approximate yearly overhead cost to host your own video meetings service

Reimagine engagement with video

Healthcare

Providers can instantly connect with patients for consultations, prescription renewals and post op follow-up with video meetings

Education

Video meetings make it easy for students to learn remotely and to connect with the teacher, classmates and content

Customer Service

Customers can have real-time video chats with agents to resolve complex issues, while agents can solve customer problems remotely

Team Collaboration

In the new reality of remote and hybrid work, video meetings have a key part to play in improving collaboration

Introducing 8x8 Jitsi as a Service (JaaS)

The world's first reliable, secure, and scalable video meeting as a service solution

Kalix enhances telehealth management with 8x8 JaaS

Challenges

- Unable to add additional features with the existing Twilio platform
- Taking too much developer time to tune and maintain
- Lacked analytics capabilities
- Limited technical support available

Results

\$3000

Reduced yearly overhead costs

30

Monthly developer hours saved

950k

Minutes of video calls supported monthly

“8x8 Jitsi allows us to deliver a smooth user interface and a great experience both for our clinician clients and their patients.”

— Felix Jorkowski, Co-founder and Chief Technology Officer

Why choose 8x8 JaaS?

Other video meeting services

- Users are required to download and install video meeting applications, or manually input meeting codes
- A fixed set of video meeting features for all use cases
- Irreplaceable video meeting platform branding, causing confusion with third-party logos and UI
- End-to-end encryption is not supported for all calls
- Tiered, pay-as-you-go pricing

8x8 Jitsi as a Service

- Powered by APIs and built using WebRTC - **easily embeddable** into any mobile, web or desktop applications, and **compatible with all popular browsers**
- **Configure, enable and disable features** easily
- **Fully customizable interface** - brand the video chat with your company logos and brand colours
- GDPR-compliant and has **built-in end-to-end encryption**
- Consistent and predictable pricing based on **Monthly Active Users**.
*for large events, we provide a real-time streaming option

Keeping more than 2 million business users safe and secure

STIR/SHAKEN

CYBER TRUST
Advocate
Certified

Easy to start, and even easier to afford

Unlike typical video solutions which are charged per-minute of usage (this adds up very quickly), with 8x8 JaaS you're only charged based on your number of **Monthly Active Users (MAU)**

Developer	Basic	Standard	Business	Enterprise
25 Users	300 Users	1.5K Users	3K Users	Need more users?
Free	\$99/£90	\$499/£450	\$999/£950	Talk to Sales
